

## **Why investing in PowerwoRx Green Technology is better than Money in the Bank!**

If you were to invest \$700.00 in a Bank C.D. at 4% annual interest, you would have a return of \$28.00 after 1 year.

If you invest \$700.00 in a PowerwoRx Whole Home Energy Management System, and saved \$20.00 per month on your electric bill, here is what you would have after 1 year:

1. - A savings of \$240.00 on your electric bill.
2. - Whole home protection against damaging electrical spikes, surges, line noise, and EMF (Electro-Magnetic Fields).
3. - Appliances that run cooler, and electronics that last longer.
4. - A \$25,000 insurance protection plan against equipment loss.
5. - A full 10 year warranty.

This means that the PowerwoRx will actually pay for itself over and over, and continue to save you money, and offer valuable protection, year after year.

Go Green! By saving on energy consumption, you will not only be helping your budget, but the environment as well!

Just imagine how many barrels of oil, and carbon emissions will be saved if we can get homeowners to install PowerwoRx on their electrical systems.
